VAG 2.0TFSi & Golf R Performance Cover Assemblies

Performance Clutches offers a range upgraded clutch kits for the VAG 2.0TFSi and Golf R platforms, including the following part numbers.

- VAG 2.0TFSi: PC-2422-DS1H / PC-2422-DS2S / PC-2422-DS3P
- VAG Golf R: PC-2352-DS1H / PC-2352-DS2S / PC-2352-DS3P

These applications feature a clamp load specification of 10,500N representing a substantial increase over the original equipment clutch to support higher performance demands.

During installation, Performance Clutches recommends applying a small amount of Loctite to the pressure plate bolts that secure the cover assembly to the original dual mass flywheel.

The reason for this recommendation is due to the use of M7-1.0x12 pressure plate bolts, which are smaller than those typically used in comparable applications. As a result, there is a potential risk of the bolt loosening under high load conditions. The application of Loctite will help ensure secure fastening and long-term reliability.
